WWW.CLIPLEX.COM.AU 1800 65 77 66

FIRSTLY THANK YOU

FOR PARTNERING WITH US!

I want to personally thank all our family, friends, supporters, faithful Clipex team members, and finally our loyal customers. Altogether, Clipex is enabled to develop and deliver some of the most affordable innovations available.

Clipex came into existence as a result of a simple childlike prayer I uttered to God on a cold winter's day in 2007 as I drove past an elderly man who was wrestling with an old rusty fence. Ten minutes later, I received a vision of a fence wire entering a slot in a post, with a rotating steel keeper. The rest is, as they say, "history!"

We are a 100% family owned company, who have received much grace and providence enabling us to survive and grow since our very humble beginnings. We left our farm in Australia in 2009 with a lot of passion (and ignorance!) with a dream to make "CLIPLEX" a reality.

We wanted to make it as affordable and available as possible. My faithful wife and four sons were armed with very limited resources, but we had our Aussie "can do" spirit. We simply believed if we persevered, we would find a way to make it happen. We've experienced incredible challenges, taken huge risks and made so many mistakes - but we survived. We now have our own plant in China, along with plenty of battle scars and many wonderful achievements. We've retained our resolute faith and hope to see our CLIPLEX dream realised!

Clipex has truly revolutionised fencing. It delivers huge cost and time savings to rural families and we're so blessed to be the ones enabled to deliver one of the biggest fencing innovations in 100 years.

Clipex has successfully grown into a vertically integrated company. This means we control the whole process - from our design concepts, our engineered solutions, our dedicated manufacturing lines, our retail stores and finally through to the sales process and installation on your farm. Clipex is now able to provide you some of the world's best innovations at a truly affordable price.

THE OLSSON FAMILY

AUSTRALIAN
FAMILY OWNED

THE CLIPLEX FAMILY STORY

Our Roots

Our story begins with Ashley Olsson. After finishing his Fitter and Machinist apprenticeship in 1985, 21 year-old Ashley assisted in the production, machinery design, fabrication, installation and maintenance for 4 factories in 3 states for "Olsson Salt" which was started by his grandfather and to this day is still proudly in the Olsson family. Two years later, Ashley changed direction to help his family manage their farm in Goulburn. It would be a few years later in 2006 that Ashley and his family would move full time to Royal Oak and run the farm full time.

Taking a Risk

One day Ashley was driving home to his farm in Goulburn when he saw an older farmer struggle with his old rusty fence. "There must be an easier way," he thought. And there was... Ashley was blessed that same day with an idea that would change farming forever. The concept for the Clipex fence post was born and fencing has never been faster or easier.

With a strong desire to change farming and help others, Ashley convinced his family to stop production on the farm and start from scratch. They all became committed to make the easiest, fastest and strongest fencing system in the world.

We have since expanded into animal handling products, like our Clipex sheep handler and cattle crushes. We also specialise in permanent yards for cattle or sheep which can be built to your specification. We pride ourselves in being able to deliver purposefully built to last products which are engineered to perform.

When you think of fencing and stockyards, think Clipex.

WE'RE WITH YOU

EVERY STEP OF THE WAY

1|

AUSSIE INNOVATION

Getting feedback from farmers on the ground and making the most of Aussie ingenuity, Clipex idea's are transformed to make Australia's best animal handling and fencing products.

2|

AUSSIE OWNED MANUFACTURING

In 2009 the Olsson family set up a Australian owned manufacturing plant in China. Today Clipex produces over 200 market leading products from their wholly owned factory.

Clipex distributes its products to all 6 continents, providing innovative solutions not just to Australia, but to the world.

3|

SHIPPED WORLDWIDE

We not only want to supply great product to our customers, we also want to deliver exceptional service. This is why we have opened our own Clipex stores putting local feet on the ground. We design, manufacture and deliver direct to you, ensuring you get the best product with exceptional service.

4|

HD Series

PNEUMATIC CRUSH SERIES

Meet the NEW PGX Series

We have redesigned our manual PG Series crush range with a brand new headrail featuring replaceable rubber and new locking cells along with noise dampening side panelling. Not only is the headrail more responsive, the crush gaps have been reduced and sound is kept to an absolute minimum.

HEADRAILS
SEE PG 11

The HD Series crush range

Our signature series has been designed from the ground up to be Australia's best cattle crush with no compromise. Because we wholly own our factory, we can design and build exactly what we want while keeping costs within your budget. We have fine-tuned our production process to enable our HD crushes to be hot dip galvanised. Pneumatically operated with patented features exclusive to the Clipex HD series range, our HD series is the pinnacle of cattle crush design.

"The Auto draft, is an absolute treat, it is now so easy to catch cows in the headrail. When you have a look at any of the things on the crush its all made really well!" - Nick Cobcroft

HD CRUSHES

HD Series

HD SERIES COMMON FEATURES

*According to the "American galvanizers association"

**For illustration purposes only

HOT DIP GALVANISED

Hot Dip Galvanised **

Zinc actively fighting corrosion**

Paint + Pre-Gal **

Once paint is chipped corrosion occurs rapidly**

Zinc (Zn) is a self sacrificing coating which prevents rust from corroding steel quickly. The more zinc present, the longer the life span of the steel. Hot dip galvanisation expands on this by bonding with the material, not only creating a thick zinc outer layer but also creating a bonded zinc inner layer (Zn-Fe), making it extremely difficult to remove. Hot dip galvanising has approximately 600% more bonding strength than zinc rich paint.*

HEADBAIL LOCKING SYSTEM

DUAL MECHANICAL LOCKS

DOUBLE PARALLEL SQUEEZE

PATENTED CLIPEX® STEEL CASTINGS

Our patented steel casting ensure the strongest possible steel frame. There are no butt joints.

AUTOMATIC DRAFTING OPTION (REQUIRES INDICATOR)

PRODUCT CODE CH-PG2000VC-AUTO

- The HD2000 series crush comes with an automatic option that enables auto drafting on weight or EID, either through the side draft, or through our 5 way drafter module. The Auto upgrade also includes remote control ability, to control the crush.
- Fully pneumatic with autonomous control
- Comes complete with heavy duty floor & chin bar
- Included load bar mount points for recommended 4500kg load bars

*Requires draft module. ^Contact us for more information

Split Gate **Entry Doors**

The HD2000 series crush features our pneumatically operated split entry doors. Designed from our heavy duty headbail, it is durable, responsive and lightning fast.

Intergrated **Side Draft**

The HD2000 crush features a side draft to enable the user to quickly draft out the side of the crush. This enables the crush to have a 2 way draft mechanism without any draft modules.

Combined with a 5 way draft module, the Auto HD2000 crush can draft up to 6 ways

*HD2000 AUTO FEATURES

State Of The Art **Technology**

The HD2000 was designed with automatic features in mind. Using state of the art technology, the HD2000 truly does make cattle handling easier and more efficient.

3 Independent Panasonic Sensors

The HD2000 Auto crush, includes 3 animal presence sensors. Using these sensors our automatic software can determine where the animal is and ensure you do not double feed the crush.

*Innovative **Control Panel****

The HD2000 Auto Crush control panel has been designed to incorporate all of your electronic control options as well as manual air toggles for more precise control. Only available with the HD2000 AUTO crush.

Increased **Adjustment***

The Clipex® HD2000 cattle crush has been designed to incorporate unprecedented adjustment to suit every application. Only available with the HD2000 AUTO crush.

*Heavy Duty Adjustable Boom Arm**

Wireless **Control***

The Clipex® HD2000 utilizes best in class wireless technology so you can control your crush wherever you are. Wireless hand remote and foot pedal options are available.

*HD2000 AUTO FEATURES

Automated **Drafting***

The HD2000 Auto crush, can automatically load, weigh, draft and reload up to 300 cattle per hour*

*Drafting indicator required

Using state of the art technology, Clipex has been able to develop a crush that does all the work for you. With its automatic features the Auto HD2000 crush can weigh and draft up to 300 cattle per hour* without having to press a button.

Automatically Draft Up To
300
Cattle Per Hour*

Auto Mode

WARNING:
Do not spray water onto this control panel.
Ensure your battery is sufficiently charged.
To use the manual control valves, put the power switch in the off position.

CLIPLEX
Fencing & Stockyards

AUTO 2000 Series

D.E.S - Technology*

The HD2000 Auto crush is implemented with our D.E.S (Double Entry Stop) system, which automatically detects if a second beast has entered the crush and uses the entry doors to remove the second beast from the crush. The Entry doors will open and close until the second beast has exited the crush.

The machine detects a second beast inside the crush, which will cause inaccurate weigh recording.

The entry doors will open for a very short period of time allowing the beast to exit the crush. If the beast has not left the crush, the entry doors will close and repeat.

Once the beast has left the crush, the entry doors will close and remain closed.
